

Set Make-up & Functional Gap Fitting

Eliminate yardage gaps and create consistent gapping within the player's set composition.

PW Loft 44.5 Carry Distance 142 GW Loft 49.5 Carry Distance 128

Distance Gap between PW & GW 14

SW Loft 54 Carry Distance 113 LW Loft 58 Carry Distance 95

Distance Gap between SW & LW 18

70% of all shots occur from within 120 yards of the green, & the easiest shot to perform is the full swing. The goal is to create a set-composition that provides as many options as possible in the scoring zone (120 yards and closer). It is better to have more options for full-swings in the scoring zone than multiple ways to hit a 200 yard shot.

* 4 iron used off tee
Strongest Iron Loft 20.5 Carry Distance 220 Weakest Hybrid Loft 21 Carry Distance 235

Distance Gap between Iron & Hybrid 15

Strongest Hybrid Loft 21 Carry Distance 235 Weakest Fairway Loft 17.5 Carry Distance 251

Distance Gap between Hybrid & Fairway 16

The Goal is to determine the gap between the strongest lofted iron with which the player can create a playable trajectory and the weakest lofted fairway which the player currently has as part of his/her set composition. We then determine where the functional gaps exist (at what yardages) in order to determine which fairway metals and/or hybrids will optimize your set composition.

RYG™ Certified Custom Fitting Summary

Make & Model	Set Composition OR Club No. & Loft	Hosel/Face Position	Shaft & Flex	Length	Lie	Grip Type & Size	Taken Stock
1. Ping G425	46 PW,		Project X	+1.5	Green	Ping Stock	Gold
