

Hi, I'm having trouble sending messages within this website. Any message or responding to a post or classified ad that comes up has no place to type text- it is only allowing me to attach files. The send to box and subject box allows me to type, but the actual message box only allows attaching files. I've been through my settings and have found no solution that will allow me to type a message.

Let me know if there is any other troubleshooting I can conduct on my own. Any insight would be greatly appreciated, thank you.

Chris
